

**Olivier
BIGOT**

I support large and mid-sized companies in the architecture and governance of their information systems, based on Azure, Fabric/Power BI, Databricks, Snowflake.

Data & BI Solution Architect

20+ years of experience

Experience

Chanel - Data Factory Tech Lead – June 2026 to Oct 2026

- Led Microsoft Fabric architecture for an ESG Data Product using Lakehouses, Pipelines, Notebooks and Semantic Models.
- Audited and assessed architecture gaps against Federated Data Platform (FDP) principles, framework and guidelines, defining remediation actions and improvement roadmap.
- Led 4 offshore engineers and coordinated business/technical stakeholders.
- Managed Agile delivery and documentation (Jira, Confluence, HLD/LLD).

Orange Business – System Data Architect – Jan 2026 to May 2026

- Contributor on the foundation definition phase for the future Microsoft Fabric platform on the Bleu sovereign cloud.
- Proposed architecture patterns for the platform, governance, and data architecture: Data Mesh, Data Products, Data Contracts, and Medallion.
- Led a Proof of Concept (PoC) of the Open Data Contract Standard.

Pernod Ricard – Data & BI Architect – Oct 2024 to Dec 2025

Data Architecture & Platforms

- Designed Data/BI platforms covering Lakehouse, MDM, and Data Hubs.
- Supported Data Engineering/DataOps teams across Azure, Snowflake, Databricks, Fabric and Power BI.
- Structured cloud/on-premises data integration and self-service BI.

Governance, Security & Industrialization

- Defined architecture standards, guidelines, templates, and monitoring.
- Ensured security and GDPR compliance using Entra ID and Key Vault.
- Implemented CI/CD with Azure DevOps and GitHub; managed Fabric capacities and workspace harmonization.

Architecture Leadership

- Aligned architecture practices and contributed to stack rationalization.
- Scoped initiatives and supported Data Engineers and Product Owners.
- Led communities of practice, stakeholder communications and technology presentations.
- Applied Agile/product-oriented methods and coordinated internal teams and external vendors.

Lifelong Learning

Business France – Data & BI Architect – Oct 2023 to Sep 2024

Redesign of one BI domain

- Assessment of the legacy architecture (Sicom CRM, on-prem SQL Server datamart, BO universes, BO reports).
- Review of the existing Azure architecture for already-migrated domains (Salesforce, Azure Data Factory, Azure SQL datamarts, AAS cubes, Power BI reports).
- Proposed target architecture: Azure adaptation, optimization recommendations, conceptual data model.

HR Workforce Monitoring with Microsoft Fabric

- Requirements gathering and analysis of the Excel-based solution.
- Technical setup: Fabric capacity, workspaces, Git integration, source connections (on-prem DB, SharePoint lists).
- Technical lead. Contribution to implementation and follow-up of actions.

Nestlé (Paris) – Data & BI Architect – Aug 2022 to Aug 2023

Marketing Mix Modeling

- Oversight of marketing data industrialization.
- Definition of data schemas and automated validation checks.
- Formalization of interface contracts.
- Design of the Data Lake architecture (Raw/Bronze, Silver, Gold).
- Offshore coordination and management of external contributors.

Business Objects Decommissioning

- Inventory of reports, usage analysis, and user scope.
- Support for the migration to Power BI.

Webhelp (Paris) – Data & BI Architect – Sep 2019 to Aug 2022

Legacy Data Warehouse Maintenance (On-Premises)

- Operational maintenance of BI platforms (SQL Server, SAP BO).
- Mapping of servers and databases.
- Identification of business use cases.
- Coordination of the offshore Data team (Madagascar) for run activities.
- Decommissioning roadmap for legacy platforms.

Implementation of a BI France Data Lake

- Design of data staging and transfer solutions (SQL Server, FTP).
- Definition of Data Lake zones (Landing, Raw, Trusted, Refined, Serving).
- Access model design (user profiles, groups, RBAC matrices).
- Coordination of Azure consultants (PM, Data Engineers).

Integration of Power BI as the new BI platform

- Setup of the technical infrastructure (capacities, workspaces, gateways, AD groups).
- Support for report creation and monitoring.

2004–2018: Data & BI Engineer in On-Premises environments

Certifications

Developer Associate SQL AI
(DP-800)

Fabric Analytics Engineer
(DP-600)

Fabric Data Engineer
(DP-700)

Power BI Data Analyst
(PL-300)

Azure Data Engineer
(DP-203)

Cloud Administrator
(AZ-104)

Databricks Data Engineer
Associate

Expertise

Services

- **Strategic consulting** on cloud architecture
- **Pre-sales, needs analysis, audits**
- **Optimization** of performance and costs.
- **Project scoping and management**
- **Coordination** between business and technical stakeholders
- **High- & low-level design** (data platform, data hubs)
- **Drafting** of technical documents and diagrams
- **Sharing** best practices, guidelines and new features
- **Governance** of tools, access and uses
- **Management** of French and English-speaking teams

Approaches

- **Value-driven delivery**: prioritizing based on final customer value
- **Agile + Scrum/Kanban**: squad-based organization and sprint delivery
- **Modern Data Stack**: modular, scalable, and agile platforms
- **Lakehouse**: combining Data Lakes (flexibility, cost) and Warehouses (structure, performance)
- **Data Mesh**: domains own their Data Products
- **CI/CD**: versioning with GIT and automated deployments
- **Self-Service BI**: empowering business users
- **Low code**: democratized data preparation and workflows
- **FinOps**: cloud cost optimization
- **Data Contracts**: formal agreements between data producers and consumers
