

**Olivier
BIGOT**

I support large and mid-sized companies in the architecture and governance of their information systems, based on Azure, Fabric/Power BI, Databricks, Snowflake.

Data & BI Solution Architect

20+ years of experience

Experience

Orange Business – System Data Architect – from 2026

Data Platform Architect

- Contributor on the foundation definition phase for the future Microsoft Fabric platform on the Bleu sovereign cloud.
- Proposed architecture patterns for the platform, governance, and data architecture: Data Mesh, Data Products, Data Contracts, and Medallion.
- Led a Proof of Concept (PoC) of the Open Data Contract Standard.

Pernod Ricard – Data & BI Architect – Oct 2024 to Dec 2025

Data Architecture & Platforms

- Designed Data/BI platforms including Lakehouse, MDM, and Data Hubs.
- Supported Data Engineering and DataOps teams in adopting Azure, Snowflake, Databricks, Fabric, and Power BI tools.
- Integrated with Power BI through semantic models and self-service BI.

Governance, Quality & Frameworks

- Defined guidelines, templates, and architecture standards.
- Designed monitoring, auditing, and data cataloging solutions.
- Ensured security and compliance using Entra ID, Key Vault, and GDPR.

Industrialization & Operations

- Implemented CI/CD practices using Azure DevOps and GitHub.
- Managed Fabric capacities and workspace harmonization.
- Structured Data Hubs and integrated cloud and on-prem environments.

Leadership & Cross-Functional Collaboration

- Aligned practices within the Data Architecture chapter.
- Scoped projects and supported stakeholders including Data Engineers, BI Specialists, and Product Owners.
- Provided cross-functional leadership through communities of practice, internal communications, and presentations.

Methods & Tools

- Applied Agile practices and contributed to technology stack rationalization.
- Used Confluence, Jira, Draw.io, and PowerPoint.
- Coordinated with internal partners and external vendors using a product-oriented approach.

Business France – Data & BI Architect – Oct 2023 to Sep 2024

Redesign of one BI domain

- Assessment of the legacy architecture (Sicom CRM, on-prem SQL Server datamart, BO universes, BO reports).
- Review of the existing Azure architecture for already-migrated domains (Salesforce, Azure Data Factory, Azure SQL datamarts, AAS cubes, Power BI reports).
- Proposed target architecture: Azure adaptation, optimization recommendations, conceptual data model.

HR Workforce Monitoring with Microsoft Fabric

- Requirements gathering and analysis of the Excel-based solution.
- Technical setup: Fabric capacity, workspaces, Git integration, source connections (on-prem DB, SharePoint lists).
- Technical lead. Contribution to implementation and follow-up of actions.

Nestlé (Paris) – Data & BI Architect – Aug 2022 to Aug 2023

Marketing Mix Modeling

- Oversight of marketing data industrialization.
- Definition of data schemas and automated validation checks.
- Formalization of interface contracts.
- Design of the Data Lake architecture (Raw/Bronze, Silver, Gold).
- Offshore coordination and management of external contributors.

Business Objects Decommissioning

- Inventory of reports, usage analysis, and user scope.
- Support for the migration to Power BI.

Webhelp (Paris) – Data & BI Architect – Sep 2019 to Aug 2022

Legacy Data Warehouse Maintenance (On-Premise)

- Operational maintenance of BI platforms (SQL Server, SAP BO).
- Mapping of servers and databases.
- Identification of business use cases.
- Coordination of the offshore Data team (Madagascar) for run activities.
- Decommissioning roadmap for legacy platforms.

Implementation of a BI France Data Lake

- Design of data staging and transfer solutions (SQL Server, FTP).
- Definition of Data Lake zones (Landing, Raw, Trusted, Refined, Serving).
- Access model design (user profiles, groups, RBAC matrices).
- Coordination of Azure consultants (PM, Data Engineers).

Integration of Power BI as the new BI platform

- Setup of the technical infrastructure (capacities, workspaces, gateways, AD groups).
- Support for report creation and monitoring.

2004–2018: Data & BI Engineer in On-Premises environments

Certifications

Developer Associate SQL AI
(DP-800)

Fabric Analytics Engineer
(DP-600)

Fabric Data Engineer
(DP-700)

Power BI Data Analyst
(PL-300)

Azure Data Engineer
(DP-203)

Cloud Administrator
(AZ-104)

Databricks Data Engineer
Associate

Services

- **Strategic consulting** on cloud architecture
- **Pre-sales, needs analysis, audits**
- **Optimization** of performance and costs.
- **Project scoping and management**
- **Coordination** between business and technical stakeholders
- **High- & low-level design** (data platform, data hubs)
- **Drafting** of technical documents and diagrams
- **Sharing** best practices, guidelines and new features
- **Governance** of tools, access and uses
- **Management** of French and English-speaking teams

Approaches

- **Value-driven delivery**: prioritizing based on final customer value
- **Agile + Scrum/Kanban**: squad-based organization and sprint delivery
- **Modern Data Stack**: modular, scalable, and agile platforms
- **Lakehouse**: combining Data Lakes (flexibility, cost) and Warehouses (structure, performance)
- **Data Mesh**: domains own their Data Products
- **CI/CD**: versioning with GIT and automated deployments
- **Self-Service BI**: empowering business users
- **Low code**: democratized data preparation and workflows
- **FinOps**: cloud cost optimization
- **Data Contracts**: formal agreements between data producers and consumers
